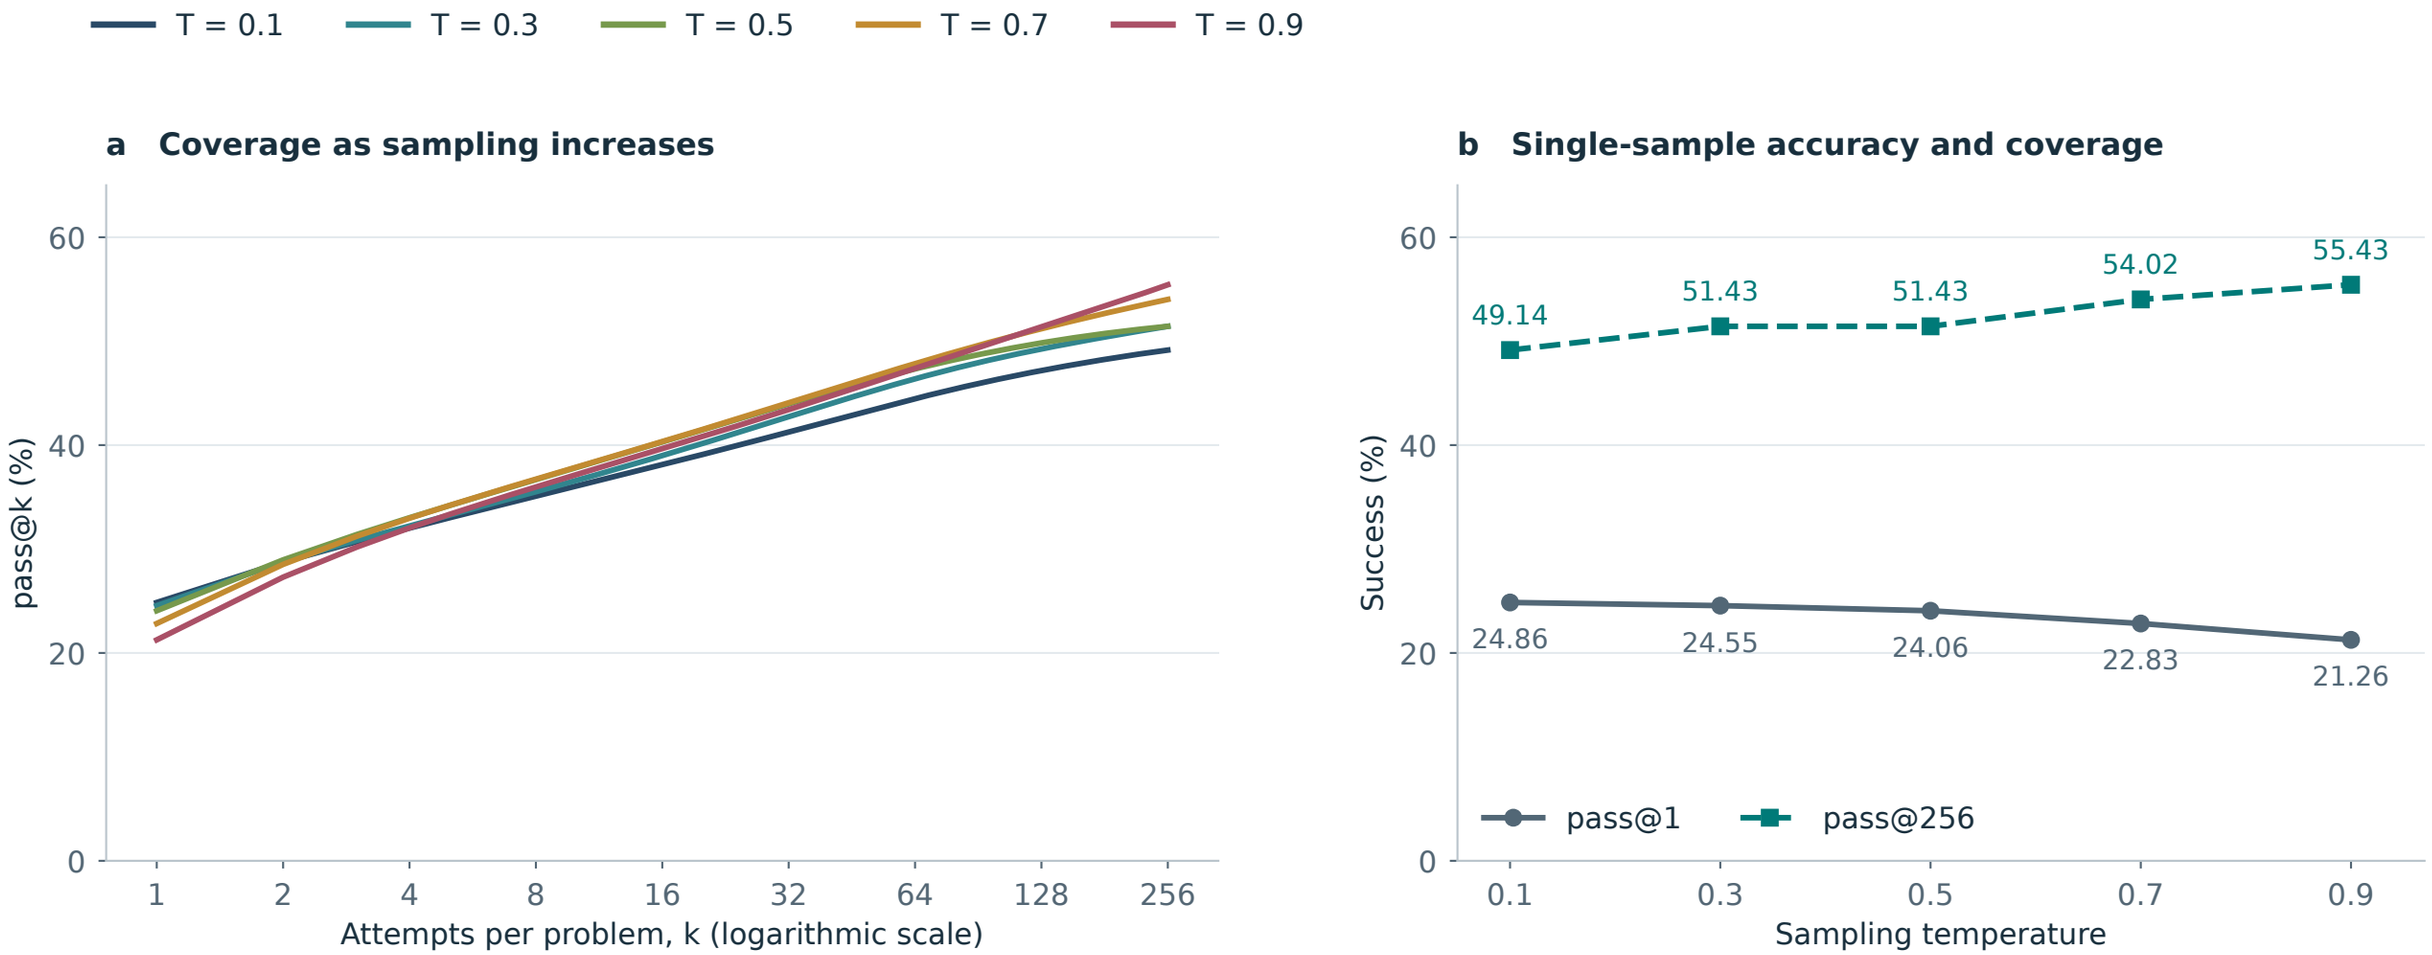
Temperature and code coverage | GLM-4.7-Flash

Expert, 50% pruning · LiveCodeBench-v6 · 175 problems



All temperatures are compared at k ≤ 256. T = 0.7 uses a saved pool of 512 responses; other pools contain 256.
8,192-token output limit. Code scoring uses the same tests and timeouts; evaluation-worker counts are documented.
